

CPS + CRT = Success

The Plan

Using IAnalyze, CRT released questions, ExamView, CPS and the SMART Board, we will improve students' overall test performance by engaging them in individualized instruction.

1. Search IAnalyze to detect areas of focus for individual classes.
2. Use the data for your classroom to determine standards on which to focus.
3. Prepare 5 questions per week based on the focus areas.
4. Questions go home on Monday. Must be finished on Friday.
5. Each day will begin with a daily oral language type question as well as a Daily Math question. (Each will focus on weak areas).
6. Friday Fun Day! Each student who brings their questions finished correctly gets their name thrown in a "hat" to draw for a small prize.
